

What is Solar PPA?

- A electricity supply agreement between *Aeronergy* and your business with **no upfront cost***
- *Aeronergy* delivers **substantially cheaper electricity** that your business can currently procure in return for a **7, 10 or 15 year agreement**
- The electricity produced by the solar system(s) will be supplied at rate as agreed.
- *Aeronergy* is the ownership of the system and will **be responsible for all the maintenance 24/7 monitoring your solar system** under the contract validity period with no additional cost*

How PPA works?

- *Aeronergy* owns the solar system and will provide a suitable system size fully installed.
- Your solar system will then **generate renewable energy** that is consumed by your property (*see Solar energy daily consumption diagram*).
- You purchase this **green power** at a lower rate than your current electricity retailer for the full term of the contract (*see Annual saving comparison chart diagram*).
- When the contract term ends, you can buy the system outright or continue with the agreement.

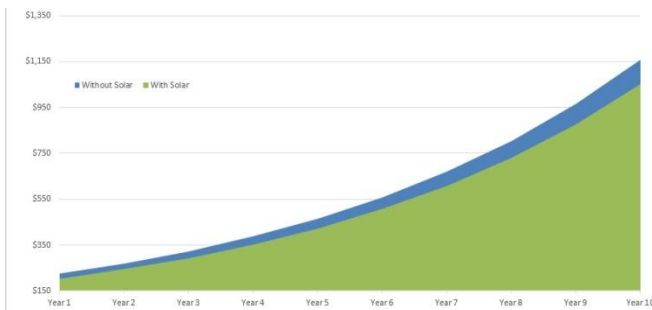

Your benefits of dong PPA

✓ Save on your electricity cost with lower solar energy rate

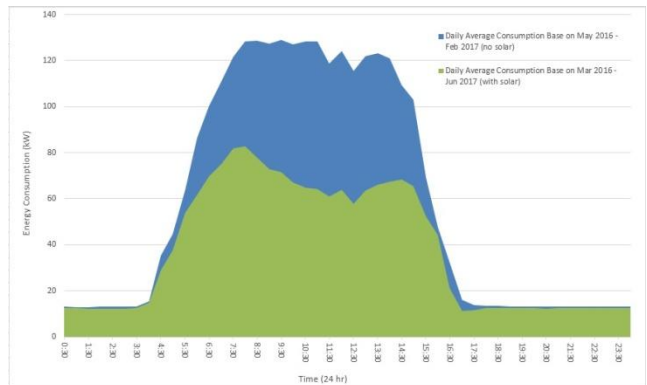

✓ We take care of your solar system 24/7

✓ Increase green energy performance rating of your premises

Estimate annual saving with solar

Electricity consumption vs Estimate Solar Energy Daily Consumption

*You may incur other non-system costs but these will be quoted or listed as exclusions prior to sale

Our outright purchase options

If you want to purchase a solar system outright, we can also offer you:

- Once-off payment, or
- Lease payment plan

We will still support you throughout the entire process including system design, grid-connect application, finance application, construction and meter connection. Once this process is completed, *Aeronergy* will return the ownership of the system back to you.
